My Work Choice: Stated-owned Business or Joint Venture
Upon graduation, virtually all college students will confront the problem of the career choice, which is truly a tough choice. Students' opinions differ greatly on this issue. Some hold that there is no better way to get a decent job than working in a stated-owned business which will guarantee my life after retirement, but others take the attitude that a joint venture outweighs any other jobs as it may provide higher income for employees.

As to myself, I prefer the latter view. A joint venture, especially a high-salary joint venture, exerts a tremendous fascination on a great number of people, with no exception to me. Although it might be impossible to make sure my retirement pension is good enough, high-salary is exactly

what I need just now. In my view, our career choices largely depend on where we want to stay for the rest of life. For me, metropolis is the place where I can grasp loads of opportunities and achieve my personal dreams. As I hold the view that live in the moment, not the future, and also in order to finance myself in some aspects such as the transportation, the house-renting, or social activities, a joint venture can satisfy my needs for the consumption I mentioned above.

In short, a joint venture is the first and only consideration in my choice of career.

With the rapidly growing popularity of science and technology, the process of globalization made great achievements. We have more chances to communicate with foreigners. Intercultural communicator has increasingly become a popular central issue of the public.

To discuss this issue from cognitive perspective, western culture is based on individualism rather than on collectivism. For instance, in the US, you always talk about individual rights. This is clearly different in China where a country is placed above your own self.

From the affect point of view, Chinese emotional expression is subtle but not directly. On the contrary, westerners express more enthusiastic. Furthermore, the Chinese people do not say yes or no, they are more accustomed to tactfully convey his meaning. No doubt, the Westerners would like to directly deliver how they think and what they want.

In behavior, many behavioral differences are due to the impact of many aspects which cover environmental, cultural, historical and other factors. Do not ask for the age and income is a case in point.

We should respect others. Respect for their privacy, their national culture, and religious beliefs. Second, we want to maintain friendly, and convey information clearly passed on through language or body language. Moreover, we just express ourselves in all sincerity and with warmth. Finally, the misunderstanding of cultural differences, we should learn to accommodate.

What is success?

Success is the ability to live your life the way you want to live it, doing what you most enjoy, surrounded by people you admire and respect. In a larger sense, success is the ability to achieve your dreams, desires, hopes, wishes, and goals in each of the important areas of your life. A successful man is one who can lay a firm foundation with the bricks others have thrown at him. Success is simple. Do what's right, the right way, at the right time. Failure is success if we learn from it. In order to succeed you must fail, so that you know what not to do the next time. Defeat is not the worst of failures. Not to have tried is the true failure. In order to succeed, your desire for success should be greater than your fear of failure. Success is about doing what you really love and what you are really good at, and being the best in your field.

Some people like living in the city because city life has a large number of advantages. They think there are more job opportunities in cities, life there is more colorful and meaningful than that in the country, and there are more modern conveniences in cities for people to enjoy.

But some other people prefer to live in the countryside. They say life in the countryside is closer to nature and better for their health, life there is quieter and that country people are more honest than city people.

I would like to live in a city when I am young to earn enough money and I live in the countryside when I am old for having a good life.
