Grabbing red envelopes has been hogging the limelight in our daily life since the 2016 Spring Festival. At no point is it clearer that this activity has endowed our vapid life with the flavor of high-tech and fun, especially giving traditions typical of festive periods, such as the Chinese New Year and Chinese Valentine's Day, a facelift.

However, some people may be trapped in a situation where they put the cart before the horse. Disappointingly, what some people do on festivals is not to communicate with their relatives and friends but to hold their cell phones and fix their eyes on the screen all day long, just in order to grab red envelopes. For my part, what really matters is the relationship instead of the money. Essentially speaking, gifting red envelopes is beyond reproach. Only in a rational way shall we not be reduced to slaves of materialism or hijacked by the high technology. Festivals offer precious opportunities for us to send good wishes to our beloved ones and what we should do is to cherish these chances rather than to ignore the essential connotation of the festivals. Anyhow, kinship, friendship and other relationships are above anything and we ought to make every endeavor lest the profound cultural atmosphere of traditional festivals should decline.

节日为我们向亲人送上祝福提供了宝贵的机会, 我们应该做的是珍惜这些机会, 而不是忽视节日的本质内涵。无论如何, 亲情、友情和其他关系高于一切, 我们应该尽一切努力, 以免传统节日的深厚文化氛围下降。

Popularity of Green Food

In recent years, green food has been gaining more and more popularity among consumers. It can be easily found on the shelves of supermarkets and in many people's shopping baskets.

There are several reasons for its popularity. Firstly, people nowadays are more concerned about their health. Green food is produced without the use of chemical fertilizers, pesticides, and other harmful substances, which means it is safer and healthier for our bodies. Secondly, with the improvement of living standards, consumers have higher requirements for the quality of food. Green

food, with its natural flavor and good quality, can meet these demands well.

Looking ahead, green food is bound to have even greater development space. As the awareness of environmental protection and health continues to increase, more and more people will choose green food. Meanwhile, the continuous improvement of relevant production technologies and quality supervision systems will also contribute to its wider popularity and better development. In a word, green food is on its way to becoming an essential part of people's daily diet.

#### 【译文】绿色食品的普及

近年来,绿色食品越来越受到消费者的欢迎。它可以很容易地在超市的货架上和许多人的购物篮中找到。

它受欢迎有几个原因。首先,现在的人们更关心他们的健康。绿色食品生产时不使用化肥、杀虫剂和其他有害物质,这意味着它对我们的身体更安全、更健康。其次,随着生活水平的提高,消费者对食品质量的要求也越来越高。绿色食品以其天然的风味和优良的品质很好地满足了这些需求。

展望未来,绿色食品必将有更大的发展空间。随着环保和健康意识的不断增强,越来越多的人会选择绿色食品。同时,相关技术和质量监督体系的不断完善也将使其得到更广泛的普及和更好的发展。总之,绿色食品正在成为人们日常饮食的重要组成部分。

### Popularity of Green Food

In recent years, green food has grown highly popular among consumers, featuring on household tables and restaurant menus.

Its popularity stems from multiple reasons. Firstly, as health awareness rises, people are more cautious about food. Green food, made with few chemical fertilizers and pesticides, has natural nutrients and no harmful residues, guaranteeing a healthier diet. Secondly, amid growing environmental concerns, consumers like its sustainable, eco-friendly production, feeling they're helping the environment by choosing it.

Going forward, green food has bright prospects. Agricultural technology advances will enhance its production efficiency and quality, making it more accessible and affordable. With society becoming more health and environment conscious, demand will expand, transforming eating habits and fueling a sustainable food industry for healthy, green consumption. In sum, its popularity will keep soaring, benefiting people and the planet.

### Popularity of Green Food

In recent times, green food has won over consumers, shifting from niche to mainstream on shopping lists.

Its popularity stems from two key factors. Higher living standards prompt health concerns. Green food, with scant use of pesticides and additives, ensures better quality and safety than regular produce. Also, growing environmental awareness matters. Its sustainable production aligns with eco-conscious values.

The future bodes well for green food. Technological progress will cut production costs, broadening access. Strengthened food safety checks and spreading healthy eating ideas will expand its market share, making it a staple in daily diets, championing healthy, sustainable consumption.

- (1) The subjects and respondents of the investigation.
- (2) Analysis of investigation result.
- (3) Your opinion or suggestions about college students' reading.

Words for reference:

娱乐类书籍 books for entertainment

应用技术 applied technology

专业用书 books relevant to their majors; professional books

科普读物 popular science books

参考范文:

Recently we have conducted a survey among 200 college students to find out their reading preference. As can be seen in the pie chart, 27% of the surveyed said they spent most of their time reading magazines and books for entertainment. What ranks the second are books of literature and applied technology, and they each account for 25%. The percentage decreases to 15% as to students who prefer to read books relevant to their majors, while only 8% tend to read popular science books during their spare time.

It should be noted that books of literature, applied technology, and entertaining books like magazines are main interests of college students. That's because these kinds of books are fun and easy to read; what's more, they bring students some cutting-edge information regarding books of applied technology. The percentage of students who like to read professional books is relatively lower may be due to the reason that these books are hard to understand and time-consuming.

To sum up, the data reveals a serious problem that college students' reading preference stays at a relatively shallow level since the percentage of reading magazines exceeds that of literature and professional books. We thus suggest that colorful reading activities like recommending great books be carried out to help students develop capabilities of appreciation and criticism.

15%的学生更喜欢阅读与专业相关的书籍,而只有 8%的学生倾向于在业余时间阅读科普书籍。

应该指出的是,文学书籍,应用技术和娱乐书籍,如杂志是学生的主要兴趣。这是因为这类书既有趣又容易读;更重要的是,他们给学生带来了一些应用技术书籍的前沿信息。喜欢阅读的学生的百分比

专业书籍相对较低可能是由于这些书籍很难理解和耗时的原因。综上所述,数据揭示了一个严重的问题,大学生的阅读偏好停留在一个相对浅的水平,因为阅读杂志的比例超过了文学和专业书籍。因此,我们建议开展丰富多彩的阅读活动,如推荐好书,以帮助培养学生培养欣赏能力和批评。

应该指出的是,文学书籍,应用技术和娱乐书籍,如杂志是学生的主要兴趣。那是因为这类书既有趣又容易读;更重要的是,他们给学生带来了一些前沿的信息关于应用技术的书籍。喜欢阅读专业书籍的学生比例相对较低,可能是由于这些书很难理解和耗时。

综上所述,数据揭示了一个严重的问题,即大学生的阅读偏好停留在一个相对较浅的水平,因为阅读杂志的比例超过了文学和专业书籍。因此,我们建议喜欢丰富多彩的阅读活动推荐好书,培养学生的鉴赏和批评能力。

A Survey Report on College Students' Reading Preference

1. Investigation time

December 2020.

2. Objects of investigation

200 college students at the National Open University Pingdingshan campus.

3. Analysis of survey results and recommendations

After several days of investigation and practice, I have a further understanding of the reading preferences of college students. Through statistical analysis of the questionnaires and data sorting, I have summarized a series of reading preferences of college students:

30% like to read literature books;

27% like to read entertainment books;

20% like to read applied technology books;

15% like to read professional books;

8% like to read popular science books;

Suggestion: College students should read more books on party history education, so that they can become the pillars of the country.

(The form below illustrates financial sources based on a survey of American college students and Chinese college students. Please write a report according to the information given below.)

- 1.描述中美大学生经济资助状况

#### 【参考范文】

Financial sources of Chinese college Students are quite different from those of American students. In China, students get 90% of their money from their parents while in America, only 50% of students' money is provided by parents. In addition, Chinese students earn only 5% of their money from part-time jobs and 5% from fellowship or scholarship while income from these two resources for American students takes up (占) 35% and 15% respectively of their total income.

I think there are probably three reasons for their differences. First, because of the influence of different social and family values, Chinese students have formed the habit of asking for money from their parents while American students have developed more sense of being financially independent. Second, most Chinese parents devote too much care to their children and they would rather save up to afford their children's education rather than encourage them to take part-time jobs."

But in America, many parents pay more attention to developing the students' ability of self-reliance (AL), so they encourage their children to find part-time jobs to earn some money by themselves. Third, since America is more developed than China, it is relatively easy for students to find part-time jobs. In China, such opportunities are rather rare.

I believe with the development of China, more and more Chinese students will realize and pay more attention to the necessity of self-dependence (独立). In addition, more and more opportunities will be provided for them to take part-time jobs. So, more students will go out of the ivory tower (象牙塔) to broaden their knowledge and to become the master of their own lives.

[译文]中国大学生的经济来源和美国大学生的经济来源迥然不同。在中国,学生花费的90%来自父母;但是在美国,只有一半的花费由家里提供。除此之外,中国学生的花费中,仅5%来自兼职,5%来自学术奖金或奖学金;然而美国学生通过这两种办法

获得的收入分别占了总收入的35%和15%,我认为造成这种差异的原因有三个。

首先,由于不同社会和家庭价值观的影响,中国学生已经形成了向父母要钱的习惯;而美国学生在经济上更加独立。其次,大多数中国父母对他们的孩子们投入过多的照顾,他们宁愿省下钱来负担孩子的教育,也不鼓励他们做兼职工作。但在美国,许多家长都更加注重培养学生的自立能力,因此他们鼓励孩子们找兼职,自己赚钱。第三,因为美国比中国发达,美国学生找到兼职工作相对容易。

而在中国,这样的机会是相当罕见的。我相信随着中国的发展,越来越多的中国学生会意识到自我独立的必要性。此外,应为他们提供更多兼职机会。这样,更多的学生将走出象牙塔,拓宽自己的知识,成为自己生活的主人。

#### Popularity of Green Food

Due to its high-quality and original tastes, green food appeals to more consumers. From supermmarkets to chain stores, green food is found everywhere.

Why is green food so popular even though its price is usually higher than other food? On the one hand, recently a series of issues on food safety makes customers disturbed and anxious. In order to have the reliable food, more housewives opt to select green food for their family. Green food has been labeled as a kind of healthy, delicious and fashionable food. This is perhaps the most important reason for the popularity of green food. On the other haod, with the advance in living standard, people will pay more attention to the quality of food and their raised income is enough to cover the expenditure of food

with a comparatively high price.

With the development of the society, green food is certainly to hold a larger portion in the market. In the near future, people will be accustomed to enjoy the fresh vegetable, fruits and cereals without pesticide residues, artificial feed and contamination.

There are several reasons for its popularity. Firstly, people nowadays pay more attention to their health. Green food is produced without the use of chemical fertilizers and pesticides, which means it is free from harmful substances and safer for our bodies. Secondly, with the improvement of living standards, consumers have higher requirements for the quality of food. Green food can meet this need as it usually has better taste and quality.

Looking ahead, green food is bound to have greater development space. As the awareness of environmental protection and health continues to increase, more and more people will choose green food. Moreover, the government and relevant departments are also strengthening supervision and support for green food production, which will further promote its development and make it become a mainstream choice in people's daily diet.

### Popularity of Green Food

In recent years, green food has been increasingly favored by consumers. It has found its way onto the tables of more and more families, gradually becoming a top choice in daily shopping.

There are several reasons accounting for its popularity. Firstly, with the improvement of living standards, people pay more attention to health. Green food, which is produced with minimal use of pesticides and chemical fertilizers, contains fewer harmful substances and is rich in natural nutrition, ensuring the well-being of consumers. Secondly, in the face of environmental pollution issues, green food symbolizes an eco-friendly and sustainable production model, meeting people's pursuit of a green lifestyle.

Looking ahead, green food is bound to enjoy even broader development prospects. As consumers' awareness of health and environmental protection continues to rise, the demand for green food will keep expanding. Meanwhile, the continuous progress of agricultural technology will further enhance the quality and output of green food, making it more accessible to the general public and playing an important role in promoting a healthy diet and sustainable development.
